SD/HD/3G-SDI to HDMI & VGA & AV Converter

NOTE: The casing design is subject to change without notice.

Our SD/HD/3G-SDI to HDMI & VGA & AV Converter is designed to convert one channel HD-SDI video source to HDMI & VGA & AV displays simultaneously. It integrates SDI Cable equalizer and re-clocker and cable driver to enhance video performance and stability.

It supports multiple resolution up to 1920x1080@60HZ and supports the most popular resolutions to ensure high compatibility with wide brands of PC and HDTV. It provides cheaper solution to connect HD-SDI to HDTV and VGA terminal.

Features :

- Support all type SDI resolution:
- SMPTE424M, SMPTE292M, SMPTE259M-C.
- Carry 1 channel SDI signal loop out.
- Automatically detect the HDMI EDID information adaptive HDMI best mode
- Support all formats asymmetric conversion
- The signal lost blue screen warning
- VGA output support 10 main resolutions
- Automatically embed SDI audio signal to HDMI signal.
- User selectable output format (HDMI and VGA and AV)
- Intelligent adaptation of PAL / NTSC
- Support independent stereo audio output

Please read the Manual before attempting to use this product. Specifications and appearance are subject to change without notice.

Disposal of Old Electrical & Electronic Equipment (Applicable in the European Union and other European countries with separate collection systems).

This symbol on the product or on its packaging indicates that this product shall not be treated as household waste. Instead it shall be handed over to the applicable collection point for the recycling of electrical and electronic equipment. By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product. The recycling of materials will help to conserve natural resources. For more detailed information about recycling of this product, please contact your local city office, your household waste disposal service or the shop where you purchased the product.

Caution

1. Handle this product with care

Avoid any shock or bumping of the product. Improper handling could damage the product. Do not handle the unit with wet hands. Provide proper ventilation and air circulation and do not use near water.

2. Requires a proper operating environment

This product is not waterproof and is designed for indoor use. The allowable temperature range for operation of this product is between $-0^{\circ}\text{C} \sim 40^{\circ}\text{C}$ / $32^{\circ}\text{F} \sim 104^{\circ}\text{F}$.

3. Check the power source voltage

The power source voltage should be within the specified range. (Product must meet the specifications).

4. Objects and liquid entry

Never push objects of any kind into this product as this may touch dangerous voltage points of short out parts that could result in a fire or electric shock. Never spill any kind of liquid on the product.

5. Cleaning

Do not use liquid or aerosol cleaners to clean this unit. Always unplug the power to the device before cleaning.

6. Servicing

Do not attempt to service this product by yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all service to qualified servicing personnel.

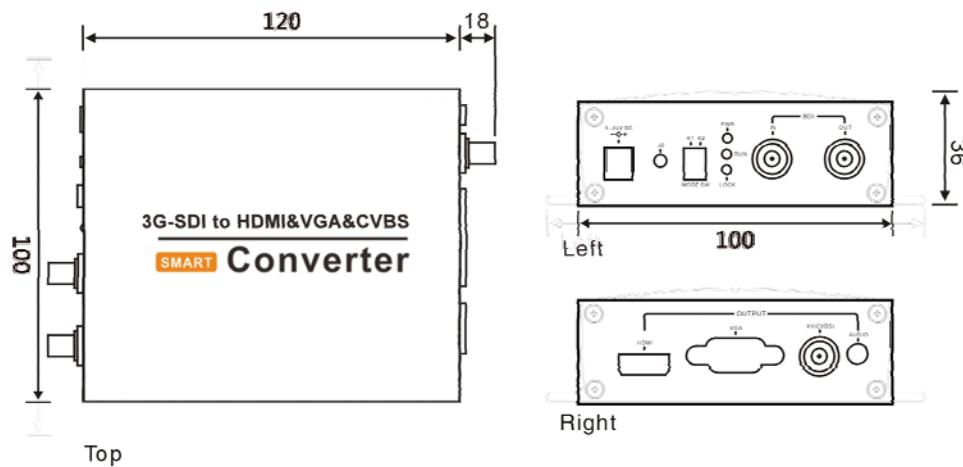

Package Contents

1. One (1) SDI to HDMI Converter
2. One (1) User Manual
3. One (1) AC Adapter
4. One (1) IR remote control

For any returns, please include all components listed above with original packaging in **Resalable Condition**.
Absolutely No Returns will be accepted if any component is missing/damaged.

Hardware Installation

1. Check the power supply configuration and connect the correct voltage according to the power supply input requirements.
2. Use the standard SDI coaxial cable and connect the SDI source to SDI input ports.
3. Use SDI coaxial cable, VGA cable, HDMI cable and connect the AV, VGA ,HMDI ,SDI output port with the display equipment.
4. Turn on the power switch.

Note: This device only support to output two kind signals simultaneously nor Three kinds of HDMI signal and AV signal or HDMI signal and VGA signal etc.

IMPORTANT NOTE: Cable & Connector for HD-SDI Camera

In order to achieve the Best Quality and Long Range coax cable run of up to 200m /600ft, you will need:

1. **Good Quality Cable:** We suggest using RG6 Belden 1694A Low Loss Serial Digital coax cable because RG6u cables have better grounding than RG59 cables. RG6 is for Digital Signal and RG59 is for Analog Signal.
2. **Good Quality BNC Connectors:** Contact Plating Gold plated pins provide exceptional conductivity.
3. **Good Quality Installation:** Do not over cut the braid because it will affect the grounding. The image will have lines and noise.
